General description
Intended use

Manual wheelchair

Panthera wheelchair model X3 is intended for individuals who need an active manual wheelchair for everyday use both in- and outdoors. The wheelchair is indicated for persons with physical disabilities and use is not restricted to a specific diagnosis. It is the individual capacity of functioning that indicates the need of a manual active wheelchair as technical aid for transferring. Recommendations for a wheelchair should be given by educated healthcare providers and thereafter a suitable product is trialed and configured for optimized seating- and driving properties by an expert. The set-up and configuration of the wheelchair is chosen for each individual and the products are in most cases not suitable for small children.

The trade name of the wheelchair is **Panthera X3** and is manufactured by Panthera AB. The manufacturer's internal article numbers are:
